Vacancy

Data Manager

Fulltime – based in Amsterdam

The PharmAccess Group

The PharmAccess Group is a dynamic international organization with a digital agenda dedicated to connecting more people to better healthcare in sub-Saharan Africa. The unprecedented rise of mobile technology is transforming sub-Saharan African economies. The PharmAccess Group believes that digitalization has the potential to revolutionize health care in Africa. We focus on innovations to serve patients and doctors through mobile technology, loans to doctors, health insurance, clinical standards and impact research. We work closely with leading local and international partners to leverage donor contributions to increase trust throughout the health system, reduce risks, and pave the way for investments. With over 60 percent of staff based in Africa, we are firmly rooted in Africa. Our specific approach to development attracts international attention, including a G20 prize for innovative financing presented by President Obama, the National Postcode Lottery's prestigious "Droomfonds", and two Financial Times/IFC essay awards.

The Position

As Data Manager you are responsible for quality control of data stored in our databases, for links between different databases, and for data storage and version control. You will provide the implementing program teams with data, reports and analyses, supporting them in data-driven decision making. You will work in a team of data managers and you will report to the Senior Manager Health Intelligence.

Key tasks include:

- Quality control of data received through our health plans and M-TIBA (http://m-tiba.co.ke/) on enrollment, savings for health care, healthcare utilization and claims.
- Managing databases in SQL Server.
- Set-up of data requirements and discuss database design for data collection in new projects or changes in current databases.
- Liaising with colleagues and partners in Africa and Amsterdam to ensure that valid, high quality data is available for reporting and analysis.
- Reporting on key performance indicators, from progress reports for the PharmAccess board to donor reporting and reporting to the internal implementing program teams.
- Liaise with colleagues from the implementing teams to develop and improve reports and analyses.
- Capacity building of colleagues and/or African partner organizations on data management, reporting and analysis.

You will operate within the Health Intelligence team which has a supporting role and provides expertise in data management, monitoring & evaluation (key performance indicators, dashboards) and in-depth analysis of combinations of data from a variety of sources, and at all levels of the programs: from the implementation in the countries to advocacy of the PharmAccess results and ideas. You will work in a multidisciplinary environment at the intersection of operations and research, economy/finance and healthcare.

Qualifications & Requirements

- Relevant Master's degree (e.g. Informatics or Econometrics) or at least three years of experience working in data management;
- Excellent verbal and written communication skills in English;
- Analytical skills and proficient at Microsoft Excel and SQL;
- Experience with QlikView is an asset;
- Excellent communication and interpersonal skills;
- Ability to teach data management skills and concepts to others;
- Ability to translate user requirements into database design requirements;
- Ability to operate strategically in a complex setting with various stakeholders;
- Willingness to travel occasionally.

PharmAccess Offers

PharmAccess offers an excellent job opportunity in a dynamic international environment with solid working conditions and a branch conform salary. The position of Data Manager is a fulltime position for an initial period of one (1) year with the intention to extend the contract. PharmAccess has a fulltime workweek of 40 hours, a collective pension scheme and a collective health insurance. We offer 25 vacation days a year based on a fulltime employment agreement.
